

Program Highlights

The Scientific Committee of the World of Microbiome Conference is currently working on creating an exciting and enriching program for this year's edition of the event. More details, including the first confirmed speakers, will be announced soon.

In the mean time, here are the highlights of the 2023 scientific program:

Thursday, 26 October 2023

- The maternal microbiome
- Developmental programming of the microbiome
- Environmental exposures shaping the microbiome

Friday, 27 October 2023

- The gut-brain axis
- The human microbiome and the immune system
- The forgotten members of the microbiome
- Diet and medication

Saturday, 28 October 2023

- From bench to bedside – using the microbiome in clinical trials
- It's not all about the gut: vaginal, oral and skin microbiomes in health and disease
- Teasing out a mechanism: how does the microbiome contribute to disease
